

It is by far the brightest, most versatile and efficient among the architectural projectors on the market today. With its 93000 lux at 5 meters and the powerful Zoom (9° - 53°), it can be used both for very long distance (even more than 1km) and for very large projections at a short distance. Equipped with electronic ballast and aluminum structure, and with only 15 kg of weight, it is extremely handy and easy to install. It has a complete range of accessories including rain cover, pole brackets, image change, animation effect.
